HuskyWorks

Introduction

Objectives

Contributors

Welcome everyone!

This is our project huskyworks. It is basically a job portal

Are you ready?

Please take note of the important details.

Introduction

Husky Works has two main users: Students & Recruiters

Students can apply for jobs & register for events

Recruiters can create these jobs & events

Objectives

01

To Construct a fully functioning job portal with full backend support

02

Students should be able to apply for jobs and register for events they are interested in with one click of a button

03

Recruiters should be able to hire students based on their application and student background

Contributors

Everything related to Authentication, Dashboard, Organizations, Chart, Backend

Erarica Mehra

Everything related to jobs, Front end Boiler Plate, AWS S3, Applicatons, Backend

Jason Paul Darivemula
